MEMORANDUM FOR : Chief, CIA Records Center

SUBJECT : Index to USIB Documents for Reference at the Johnson Library

REFERENCE : 23 January 1969, subject as above

25X1

1. The reference memorandum on this subject forwarded to you two attachments (A and B), which are indexes of USIB actions taken during the Johnson Administration. The reference memorandum stated that an exact duplicate of Attachment A, which provided reference numbers and subject titles to all USIB papers prepared during this period, was being forwarded to the Johnson Library with the statement that the indexed documents will be available at the CIA Records Center for historical research at such future date as may be determined by the Director of Central Intelligence or his successor.

2. We have now been advised by Mr. Hugh Cunningham, overall CIA coordinator for the Johnson Library project, that the Austin Library is not yet prepared to handle material of this classification. Consequently the duplicate of Attachment A to my 23 January memorandum has not been forwarded to Austin as you were informed, but has been returned to the USIB Secretariat.

3. Following consultation with Mr. Cunningham it was agreed that the enclosed duplicate to Attachment A in the reference should be forwarded herewith to you to hold until such time as Austin is prepared to handle material of this classification. When the LBJ Library is equipped to handle this type of material it would then be appropriate to forward it to Austin with the explanation that all USIB records indexed therein will be held in CIA custody, to be made available for historical research at such future date as may be determined by the Director of Central Intelligence or his successor.
